## Optional Accessories for Dominator<sup>®</sup> Overhead Garage Door Openers

Make your home even more safe and secure with our range of great accessories.

### (1) P.E. SAFETY BEAMS

Protect your family and your car with the P.E. Safety Beams. As soon as an object or person moves through the invisible safety beam the door will stop or reverse to avert any contact damage occurring.

### (2) TRIOCODE<sup>™</sup> KEYRING TRANSMITTERS

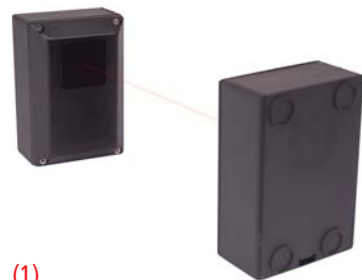

Available in both **keyring** and **wireless wall mount** models and with multiple units able to be coded into an opener, **TrioCode<sup>™</sup>** transmitters use multi-frequency technology to ensure interference is never an issue for you and your family.

### (3) STAND ALONE RECEIVER

Use your **TrioCode<sup>™</sup>** transmitter to operate other items around your home by connecting the Stand Alone Receiver to other compatible non-Dominator appliances.

### TRIOCODE<sup>™</sup> WIRELESS DIGITAL KEYPAD

This external weatherproof access device provides greater flexibility for accessing your home. Numerous individual PIN codes can be created, so you can give your kids or even the pool cleaner specific access to certain doors and gates. It also allows for convenient access when you return from exercising.

#### TECHNICAL SPECIFICATIONS: DOMINATOR<sup>®</sup> GDO-7v2

Input Voltage	230Vac – 240Vac 50Hz
Motor Voltage	230-240VAC (Thermally Protected)
Standby Power	2.0W
Motor Power	0.250kW (1/3 HP)
Average Peak Noise Level	72dB
Minimum Headroom	40mm
Maximum Door Size (h x w)	3000mm x 5500mm
Maximum Door Weight	100kg
Max Door Area	16.5m <sup>2</sup>
Peak Lifting Force	700N
Typical Travel Speed	140mm/sec
Courtesy Light	60W Rough Service Globe
Receiver/Transmitter Type	<b>TrioCode<sup>™</sup></b> UHF 434.37, 433.47, 433.92 Mhz
Receiver Storage Capacity	14 x 4 button transmitters
Coding Type	Code hopping (Non-linear encryption algorithm)
No. of Code Combinations	4.29+ billion random codes
Warranty	2 year parts warranty

## DOMINATOR® THE RIGHT CHOICE

Dominator® has been at the forefront of innovation and design of garage door systems for decades.

The all new Dominator® GDO-7v2 continues this legacy with an array of new features including the revolutionary new coding system **TrioCode™**.

Designed and engineered by an internationally renowned team of experts, the Dominator® GDO-7v2 is set to define the future of door automation with the latest technology, systems and production methods all designed with ease of use, safety and security in mind.

## DOMINATOR® ESSENTIAL OPENER FEATURES

Each **Dominator® GDO-7v2** Garage Door Opener comes with the following essential features and benefits:

- ▶ Intelligent Sensitivity System (ISS) reacts to door obstructions to minimise the risk of damage to people, pets and property
- ▶ Ready integration with other products including sliding and swing gate openers with the use of our stand-alone receivers
- ▶ The PG-3 Programmer allows Dominator® service professionals to update your opener with the latest operating firmware and advanced functions, rapidly and accurately diagnose operational issues, and much more
- ▶ Customisable operating modes that provide greater flexibility for your garage, including Vacation Mode – which blocks out all but one transmitter, and Pet & Pedestrian Mode - providing a limited opening for non-vehicular access
- ▶ **TrioCode™** multi-frequency coding system that uses three frequencies to overcome the increasing problem of interference within your neighbourhood
- ▶ **TrioCode™** transmitters also use code hopping technology to generate a new random code from over 4.29 billion possibilities with each use. You can rest assured with these odds that only your transmitters will open your door

## WHAT IS TRIOCODE™?

**TrioCode™** is a revolutionary new coding system that provides enhanced reliability and security by using three frequencies to overcome interference issues.

## WHY DO I NEED IT?

Increasingly our homes are filled with wireless doorbells, cordless headphones, wireless entertainment systems, baby monitors and more, many of which operate on the same frequencies as garage and gate openers. Frustratingly, these devices can jam out your garage or gate opener's receiver, and the offending device may not even be in your home, it could be over 200 metres away.

**TrioCode™** overcomes this challenge by simultaneously transmitting on three different frequencies. Even if two frequencies are jammed, the **TrioCode™** transmitter will still operate your door.

A Dominator® Garage Door Opener featuring **TrioCode™** is your insurance that your garage door will continue to operate without interference for years to come, no matter what new technology is introduced to your home or neighbourhood.

## AC POWERED OVERHEAD GARAGE DOOR OPENER WITH TRIOCODE™ TECHNOLOGY

Designed for even the most difficult of doors, the **Dominator® GDO-7v2** Overhead Garage Door Opener possesses advanced operating technology to make it amongst the smartest AC powered openers in the world.

Along with the **Dominator® Essential Opener Features** (see left), the **Dominator® GDO-7v2** introduces your door to:

- ▶ Rubber isolated **anti-vibration mounting points** help reduce the motor vibrations transferring through to the ceiling – perfect where garages are located under bedrooms, for families with young children or shift working couples
- ▶ **Greater reliability** due to fewer moving parts and exacting manufacturing tolerances
- ▶ **Electronic braking** stops the door consistently, prolonging the life of the door by preventing damaging “bottom outs”
- ▶ **S-ALPS (Semi-Automatic Limits Positioning System)** to ensure reliable limit setting with minimal maintenance
- ▶ A **C-Rail** that encases the chain and trolley assembly for increased safety and reduced maintenance requirements
- ▶ **Courtesy light** that illuminates with each cycle, and can operate independently of the door
- ▶ The **Dominator® GDO-7v2** comes standard with one **TrioCode™** Wireless Wall Mount Transmitter and two **TrioCode™** Keyring Transmitters
